

PROJECT SUMMARY

UNICEF Education Performance Dashboard

Location: Kano State, Nigeria

Prepared by: Umar Musa Isah

Date: May 2026

Project Objective

To analyze key education indicators across selected schools in Kano State and build an interactive dashboard that supports evidence-based decision-making.

Tools Used

- Python (Dataset Generation)
- Microsoft Excel (Cleaning & Analysis)
- Power BI (Dashboard Development)
- PowerPoint / Word (Reporting)

Key KPIs

- Total Enrollment
- Male vs Female Enrollment
- Attendance Rate
- Teacher Count
- Student-Teacher Ratio
- Exam Pass Rate
- Best Performing LGA

Key Findings

- Urban LGAs showed higher enrollment levels.
- Some schools had lower attendance rates.
- Teacher shortages were observed in selected areas.
- Female participation gaps existed in some communities.

Business Value

This dashboard can help education stakeholders identify gaps, prioritize interventions, and monitor performance more efficiently.

My Role

Designed dataset structure, generated sample data using Python, cleaned data in Excel, developed Power BI dashboard, and produced final reports.
